

# Facility Improvement Project Update

October 3, 2013

- The steel beam that students signed has been installed in place. You can see it from the fence. Look through the middle entrance and it's the 2<sup>nd</sup> beam in.
- Roof nearly complete on multi-purpose room. Roofing will continue on front part of 800 section
- Floor will be poured in 800 section on Monday
- Front area of 700 section has been decked. (computer lab, IT areas, meeting room)
- Interior walls for HS section going up
- Remaining steel needed in 900 section (adult ed) will be installed on Thursday of next week
- Exterior stone veneer will be started next wee
- Most exterior walls have been filled with foam insulation
- Black covering on exterior walls is the air barrier to protect interior spaces

For more details about the project, make sure to check out the other updates on the facility project page plus photos from the project's beginning to end at [www.Facebook.com/EHOVEworks](http://www.Facebook.com/EHOVEworks).
